

# FOLDIA PLUS

RC193

***The Foldia Plus  
is an adjustable 2 sided  
roll cage that can be  
extended to full or half height  
to suit your requirements.***

The Foldia Plus is an adjustable 2 sided roll cage that can be adjusted where space is limited.

Following the success of the Foldia Roll Cage - the most ergonomic and space saving roll containers available, the sides of the Roll Cage allow the operator to easily decrease the height of the unit where door way or movement is restricted to that of a normal full height roll cage.

The sides can be fully extended to a height of 1800mm or if space is limited, reduced to approximately 1300mm.
